

**Task:**

1. Categorize the different texts in one of the following category
  - Question
  - Complaint
  - Praise
  - Suggestion
  - None
2. Categorize the different texts according to their main subject
  - Builds (What armor? What weapons? Which stats? ect...)
  - PvP related discussions (Arenas, OPRs, races, wars)
  - PvE related discussions (Expeditions/Dungeons, farming, crafting)
  - Hardware-related (pc, graphic requirements, graphic problems)
  - No categorization possible
3. Categorize the different texts according to their general feelings
  - Positive (good, excellent, incredible, amazing)
  - Negative (bad, boring, not-working)
  - Neutral
  - Cannot categorize

**Tries per tasks**

Table of annotation success rate:

1. Category is okay = 1
  2. Category could be okay, but not main element of the text = 0.5
  3. Category would've been good, if prompt allowed it: = 0.25
  4. Category is wrong/Category is not part of the choice and is wrong = 0
- 
1. All categories have been identifies = 1
  2. 50% + of categories have been correctly identified = 0.75
  3. Some categories (-50%) have been correctly identified = 0.5
  4. One category has been identified/Suggested alternative could be ok = 0.25
  5. No category has been correctly identified/No input/Suggestion category is wrong = 0
- 
1. feeling correctly identified = 1
  2. Two answers, but one is correct: 0.5
  3. feeling not correctly identified/not answered/wrongly classified = 0
