What?

- 200 Posts & Comments from the Subreddit
- 3 Categorization Tasks
- 3 large language models
- Mistral's intermodel comparison
- Classification according to the main category, the main subject(s) and main feeling of the data

Goals

- Evaluate the capacity of each model to categorise data according to a specific prompt
- Evaluate the working possibilities with each of the model
- Evaluate the ebay way to work with each model
